**Sent:** Wednesday, January 21, 2026 9:15 AM

**Subject:** Critical, OPERATIONAL FLOW ORDER,20260124,BBT (AlaTenn) LLC,006900773

Due to anticipated colder weather moving across the system along with associated high demand, and in an effort to protect system integrity and firm service obligations, effective at 9:00 AM for gas day January 24, 2026, and continuing until further notice, AlaTenn is issuing a Balancing OFO pursuant to Section 22.2(b) of the General Terms and Conditions of AlaTenn's FERC Gas Tariff.

AlaTenn is requesting all delivery point operators ensure actual daily takes out of the system are equal to or less than scheduled quantities regardless of the cumulative imbalance position.

In the event the Balancing OFO is not adequate in maintaining operational integrity of the system, AlaTenn may issue a Critical Day OFO pursuant to Section 22 of the General Terms and Conditions of AlaTenn's FERC Gas Tariff.
